Sure Solutions
Efficiency...only better

Our legacy at SureSolutions™ stems from Deki Electronics Ltd, India's leading electronic components manufacturer. While Deki's expertise is film capacitors, we bring the same solution-oriented DNA to our part of the business.

Quality is not just a word for us and we think of ourselves as partners with our customers.

A problem, for us, is the precursor of a new way of doing things and, we understand not just technology but also how to get the most out of it.

We came about to focus on the idea of "increasing business efficiency" and we have remained true to it. From retail security when we started out, to immersive video today, we have ensured that we add value to whatever we offer.

Our manufacturing roots ensure that our solutions are built for Indian conditions. Being customer-centric means assured support. After all, we are not system integrators but solution providers.

Living up to a legacy takes some doing.

Our technical partner

Callidus
trading, spol. s r.o.

Callidus, founded in 1999 in Ostrava, Czech Republic, is one of Europe's largest manufacturers of electronic anti-theft systems.

The company's production is based on its own research and development and has many patents to its credit.

Callidus strives to keep abreast of technological evolution of the era and provides customers with independent consultancy and atypical product modifications. The company was one of the first in the world who started to develop metal and magnet detection and has the widest range of EAS product offerings - RF LF Mono, RF 8.2 MHz Mono, RF 8.2 MHz Dual, AM and RF deactivators, AM deactivators, metal and magnet detectors, detectors of AM jammers with IR people counter, RF and AM hand detectors, eCOMM communicators, etc.

THE SURECHECK® RANGE

CPP+ 540 AM/RF Hybrid System

Features

- Both technologies (AM and RF) in one pedestal
- Options for advertisement (LED backlighted panels)
- Internal power supply, consumption up to 50W (backlight off)
- Network connection, remote tuning and management
- People counting and alarm validation
- Build-in jamming detection
- Optional foil bag and/or permanent magnet detection
- Buzzer and RGB alarm lights
- Different alarm types settings (incoming, outgoing, etc.)
- Easy-to-use Dashboard for alarm event management
- Advanced SW features (tag-too-close, adaptive sensitivity adjustment, etc.)

Optional Accessories

- Bumper
- Shop monitor lite dashboard
- AM/RF S1000 deactivator and pads

Compatibility

- AM 58 kHz and RF 8,2MHz tags, labels and accessories

SPECIFICATIONS	
Mechanical	
Dimensions (mm)	1680 (H) × 545 (W) × 55 (D) – Base depth 95
Weight	10-14 kg (approx.)
Composition	Plastic, acrylic, aluminium
Electrical	
Power Requirement	230V/50Hz, 50W max
Operating Frequency	58 kHz and 8.2 MHz
Alarm Mode	Buzzer/RGB alarm indicator
Environmental	
Operating Temperature	0–49°C (equipment for normal indoor use)
Relative Humidity	0 - 90%, non-condensing
